Press Release

Knightware announces SQM-LE Reader for Windows®

Read Unihedron's new Sky Quality Meter -LE electronically!

Pasadena, CA, September 13, 2008: Knightware is pleased to announce the release today of **SQM-LE Reader**, a Windows based software program that allows users to read Unihedron's new SQM-LE both remotely via Internet, and locally using an Ethernet crossover cable. Knightware worked with Unihedron (Grimsby, Ontario) testing the new device which allows users to determine objectively how dark the night sky is. **SQM-LE Reader** allows the user to read a device on demand or continuously on a periodic schedule. Readings include magnitude per square arc second, device serial number, date/time of reading and more. **SQM-LE Reader** runs under Windows XP SP2 or later, and Windows Vista (32 bit).

Pricing and Availability

SQM-LE Reader is available now at no charge by digital download only at <http://www.knightware.biz/sqmreader.htm>.

About Knightware

Knightware, LLC is located in central North Carolina and specializes in creating software for astronomers. Its flagship product, *Deep-Sky Planner, Observation Planning and Logging Software for Astronomers* has been in publication since 1994 and is in use worldwide.
