# Press Release

## **Knightware announces SQM Reader Pro** for Windows®

Read Unihedron's new Sky Quality Meter -LE electronically!

**Cary, NC, February 14, 2009:** Knightware is pleased to announce the release today of

**SQM Reader Pro**, a Windows based software program that allows users to read Unihedron's new SQM-LE both remotely via Internet, and locally using an Ethernet crossover cable. Knightware worked with Unihedron (Grimsby, Ontario) testing the new device which allows users to determine objectively how dark the night sky is. **SQM-LE Reader** allows the user to read a device on demand or continuously on a periodic schedule. Readings include magnitude per square arc second, device serial number, date/time of reading and more. **SQM-LE Reader** runs under Windows XP SP2 or later, and Windows Vista (32 bit).

### **Pricing and Availability**

**SQM-LE Reader** is available now by digital delivery or CD at <http://www.knightware.biz/sqm/readerpro.htm>.

### **About Knightware**

Knightware, LLC is located in central North Carolina and specializes in creating software for astronomers. Its flagship product, **Deep-Sky Planner, Observation Planning and Logging Software for Astronomers** has been in publication since 1994 and is in use worldwide.

**For Release September 13, 2008**
